

VAULTSYSTEM

Your Vault

A private room at spawn that belongs to you. Not a menu - a real space you walk into, decorate, and fill with whatever chests you like.

COMMAND
`/vault`

FROM RANK
Mystic

LARGER ROOM
Legend

EXPIRES
never

THE WHOLE SETUP, IN ORDER

- 1 Type `/vault`
- 2 Make it yours
- 3 Upgrade it if you rank up

1 Type `/vault`

The first time you run it you are handed the next free room, and it is yours from then on. Every time after that the same command puts you back in the same place.

2 Make it yours

It is ordinary protected space. Chests, barrels, item frames, decoration - all of it works normally, and nobody else can get in. Ask a staff member if you would like it named.

3 Upgrade it if you rank up

Legend and Ancient get access to the large vault rooms. Ranking up does not move you automatically, because your chests are in the old room and moving them is your decision.

- 1 Type `/vault upgrade`. It shows you which room you would move to.
- 2 Empty your current room first. Your items do NOT travel with you.
- 3 Type `/vault upgrade confirm`. You are moved and your old room is released.

! Empty the old room first

The upgrade moves your assignment, not your belongings. Anything left behind goes back into the pool with the room. Carry it across yourself before you confirm.

Commands

`/vault`

Go to your vault. Claims one for you the first time

/vault upgrade

Preview a move to a large room

/vault upgrade confirm

Actually move

Your vault is never taken back

Even if your rank lapses, the room stays assigned to you until a staff member frees it by hand. Nothing you leave inside is at risk from an expiring rank.

If /vault tells you there are no free rooms, every one built so far is taken. Tell a staff member and more will be added.
